

Sprint 1 Report

Slug Meter

Limax Pueri

October 23, 2023

Actions to Stop Doing

- Stop allowing daily scrum to go over 15 min. Meetings become less effective and team members become exhausted
- Stop showing up to meetings late. We waste time when we show up late and the production of the meeting goes down
- Stop setting up user stories that are dependent on one another. They don't adhere to the 'Individuality' of INVEST.

Actions to Start Doing

- Start meeting together in person. This will hold members accountable and ensure everyone is doing their part to get the product done
- Start scheduling more group work sessions between those who are working on the same or dependent tasks. This will increase productivity and encourage members to get work done

Actions to Keep Doing

- Dividing work among members to tackle more problems simultaneously. We've been doing good on splitting tasks

Work Completed/Not Completed

Completed:

- Set up MongoDB and schema
- Set up GitHub Repo
- Updating database with MongoDB node.js drivers

Not Completed:

- Querying database with JS via driver or API

Work Completion Rate

½ User stories were fully completed.

7/8 Tasks were completed.

One of the incomplete tasks is being backlogged until a later sprint.

~26/32 total task hours were completed. (Learning 10 hrs) x6
